

Fuelled by Adventure

Weise™ is a brand created by riders for riders

Fuelled by adventure, powered by passion and inspired by freedom.

Based in the heart of south-west England, the firm has been quietly getting on with making life easier, safer and more comfortable for all kinds of motorcyclists. Whether you're a daily urban commuter, a summer Sunday fun rider, a long-distance commuter, or even a multiple TT-winning road racer, Weise™ makes the perfect kit for your needs.

Several factors are involved in the winning Weise™ formula. Most importantly, the designers and product engineers are motorcyclists, and are immersed in the rich biking culture of the UK. Their experience is hard-won, involving myriads of miles in the saddle whilst analysing the fit and performance of products such as a glove, and details like the sleeve of a jacket or the waistband of a pair of trousers.

The brains behind Weise™ kit come from the region's time-honoured tradition of engineering and design. The firm's head office is based in Bristol, the home of Isambard Kingdom Brunel's famed engineering feat, the Clifton Suspension Bridge. In recent decades, the city has become a centre for technical excellence in the aerospace and other industries, meaning Weise™ shares its talent pool with some of the biggest names in the aviation and technology sectors.

This unique combination of real-world riding with engineering and design heritage gives Weise™ a huge advantage in this cutting-edge market. Meanwhile, partnerships with world-class brands such as Cordura™, Outlast® DuPont Kevlar™ and Re Zro™ put Weise™ kit at the forefront of protection and comfort technology.

Designed in Bristol, and then perfected in the real world. It's the Weise™ way.

Range Overview 2026

The majority of products in the Weise™ clothing range have been tested at certified external facilities and accredited to meet or surpass current CE Approved standards.

AA Class is one of the highest levels of protection, and ensures that all Weise™ clothing that has achieved this certification offers sufficient protection to riders without significant gains in weight or a reduction in the ability of the rider to control the motorcycle.

RE ZRO®

The worlds first recyclable & biodegradable impact protection. RE ZRO®, are not just redefining impact protection; they're leading the charge towards a more sustainable future.

BIODEGRADABLE

RE ZRO® sets a new standard as the world's first biodegradable* impact protection. Pioneering technology accelerates the breakdown of their products in a landfill environment, so they return to zero in an estimated 3-5 years, compared to decades for traditional armour.

RECYCLABLE

Innovation goes beyond personal protection to safeguard the planet. RE ZRO® armour is crafted using a single polymer, TPE, which is injection moulded.

This manufacturing process uses high quality, highly accurate tools, reducing the amount of waste produced during moulding. The minimal waste that is produced is collected, reground, and reused in production.

#madebetter

RE ZRO®

RE ZRO®

IMPACT PROTECTION. MADE BETTER.

LIGHTWEIGHT

RE ZRO's distinctive open geometry design uses minimal material for an ultra-lightweight feel without any compromise on safety, so you can stay focused on peak performance.

VENTILATED

RE ZRO's distinctive open geometry design uses minimal material for an ultra-lightweight feel without any compromise on safety, so you can stay focused on peak performance.

FLEXIBLE

Unlike conventional technology that becomes brittle in low temperatures, RE ZRO® offers unparalleled flexibility, remaining supple in all conditions, from scorching heat to freezing cold.

“

What we loved most about the RE ZRO® in Moab was its exceptional breathability, a must-have in the intense desert heat. Off-road riding is demanding, and staying cool while working hard and sweating is essential. Its outstanding flexibility provided a full range of motion, crucial for tackling rugged trails. The RE ZRO® armour delivered perfectly.

”

Wren Maher & Jordan Lee

*RE ZRO TPE material has been independently tested and achieves the biodegradability of 14.14% over 90 days in accordance with ASTM D5511-18 & ISO 15985 : 2014. For full terms see www.re-zro.com/terms
